Profile

A results driven web developer who is quick to adapt and master new technology. With a strong personal portfolio, I'm also experienced in working independently and in agile environments, I strive to deliver on time and with strong attention to detail, all whilst being an enthusiastic team player.

Projects & Work

Self - May 2017 to Present *Web Developer*

Developed both single and multi-page web applications, obtaining a deep skillset in a variety of languages, tools, frameworks and libraries. Personal projects include:

Statify Music

A full-stack web application that fetches and analyses a user's Spotify listening habits. Built with a rich toolset, including react, express, material ui and node. Extensively unit tested via mocha, chai and enzyme. Implemented server side rendering for fast page loads.

Isomorphic Boilerplate

A template using webpack for building node apps. Provides hot reloading of server and client out of the box for optimal dev efficiency.

Online CV

A responsive and interactive CV. Entirely svg based, it combines outlines with stroke based animations. Built with javascript, html and css.

Self - Aug 2016 to April 2017 *Audio Developer*

Recorded and shipped seven audio library products to online consumers.

Space Budgie - May 2013 to Aug 2016 *Co-Director*

Co-founded a BAFTA winning independent studio. Multi-tasked in business development, C# audio programming and audio design. Worked as part of an agile team, successfully releasing two commercial games.
