I am a versatile software engineer and tech lead who delivers impactful solutions in complex, large-scale environments. Experienced in continuous integration, delivery, and deployment, I have a proven track record of shipping products at scale. I enjoy tackling a range of problems with a user-focused mindset, all whilst being a collaborative team player.

Experience

Monzo - Senior Software Engineer

August 2025 to Present

- Tech lead for integrating a third-party CRM marketing platform. Supported the launch of 14 campaigns, delivering over 11 million sends.
- Developed a data ingestion pipeline using a mixture of Go and DBT, implementing over 200 data features across personal and business banking.

Findmypast - Principal Software Engineer

Jul 2018 to June 2025

- Worked on a family history product featuring billions of searchable records.
- Initially contributed as a full-stack engineer, later specialising as a DevOps engineer.
- Advanced from Junior to a Principal Engineer level over 5 years.
- Led an engineering effort to gain a 12x increase in capacity to our entitlements system, successfully handling the 1921 census release with zero downtime.
- Managed the migration of a feature toggle management system from JavaScript to Go, yielding a 10x reduction in resource consumption and 3x reduction in response times.
- Delivered a production Kubernetes cluster migration from VMs to bare-metal, yielding a 3x reduction in request latency.
- Led a machine learning stack migration to Kubernetes, enabling fully automated pipelines.
- Leveraged LLMs for structured data extraction on newspaper clippings, converting over half a million images into accurate, searchable text.
- Increased ML model throughput by 3x by optimising our GPU sharing strategy.
- Mentored and onboarded new hires into engineering teams, ensuring smooth integration and knowledge transfer.
